

Problem G. Staircase

OS Linux

Staircase detail

This is a staircase of size $n = 4$:

```

1 |  #
2 |  ##
3 |  ###
4 |  ####

```

Its base and height are both equal to n . It is drawn using `#` symbols and spaces. *The last line is not preceded by any spaces.*

Write a program that prints a staircase of size n .

Function Description

Complete the `staircase` function in the editor below.

`staircase` has the following parameter(s):

- `int n`: an integer

Print

Print a staircase as described above.

Input Format

A single integer, n , denoting the size of the staircase.

Constraints

$0 < n \leq 100$.

Output Format

Print a staircase of size n using `#` symbols and spaces.

Note: The last line must have 0 spaces in it.

Input	Output
6	<pre># ## ### #### ##### #####</pre>

Explanation

The staircase is right-aligned, composed of # symbols and spaces, and has a height and width of $n = 6$.
